SIEMENS 4<sup>252</sup>

Series 02

# Four-port slipper valves PN10, female-threaded

**VCI31...** 

Four-port slipper valves, PN10, female-threaded

- Grey cast iron EN-GJL-250
- DN 20...40
- k<sub>vs</sub> 6.3...25 m<sup>3</sup>/h
- Angle of rotation 90°
- Female-threaded connections, Rp3/4 ... Rp11/2
- With manual adjuster
- Can be fitted with type SQK... or SQL... electromotoric actuators
- No maintenance required

## **Application**

For use in closed-circuit heating systems, preferably in mixing applications.

	-			with actuators SQK, SQL
Type	Connection [Inch]	DN	<b>k</b> <sub>vs</sub> [m <sup>3</sup> /h]	∆ <b>p</b> <sub>max</sub> [kPa]
VCI31.20	Rp ¾	20	6.3	
VCI31.25	Rp 1	25	10	20
VCI31.32	Rp 1¼	32	16	30
VCI31.40	Rp 1½	40	25	

DN = Nominal size

= Nominal flow rate of cold water (5...30 °C) through the fully open slipper valve by a differential

pressure of 100 kPa (1 bar)

= Maximum permissible differential pressure across the valve's control path, valid for the entire  $\Delta p_{\text{max}}$ 

actuating range of the motorised slipper valve

## **Accessories**

Туре	Description
ASK32	The ASK32 mounting kit consists of a console and screw(s). For VCl31 Series 02. Mounting instructions are enclosed with the kit.

Ordering The valve, actuator and mounting kit, if required, must be ordered separately.

When ordering, please specify the quantity, product name and type code.

1 3-port slipper valve type VCI31.25 Example:

> 1 actuator type SQK33.00 and 1 mounting kit, type ASK32

Delivery The valve, actuator and mounting kit are packed separately.

Spare parts See overview, section "Spare parts", page 6

## Actuator overview

Туре	Actuator type	Operating voltage	Positioning signal	Positioning time for 90°	Torque	Data- sheet	
SQK33.00 <sup>1)</sup>	electro- motoric	AC 230 V	3-position	125 s	5 Nm	N4506	
SQL33.00 <sup>3)</sup>					12,5 Nm		
SQL33.03 3)				30 s	10 Nm		
SQK34.00 <sup>2)</sup>				135 s	5 Nm	N4508	
SQL83.00 <sup>3)</sup>		AC 24 V		125 s	12,5 Nm	N4506	
SQK84.00 <sup>2)</sup>				135 s	5 Nm	N4508	

Can be fitted with 1 auxiliary switch, type ASC9.5

Can be fitted with 1 auxiliary switch, type ASC9.7

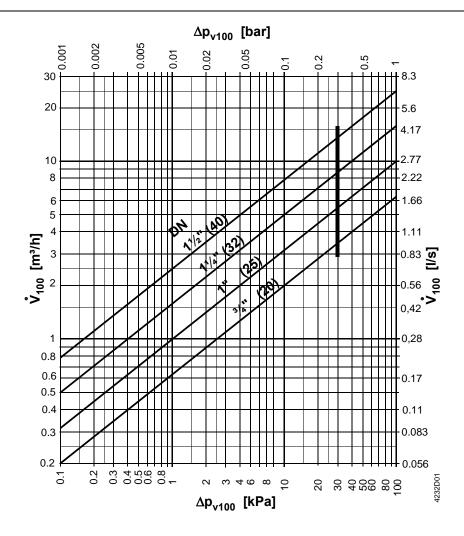

Can be fitted with 1 auxiliary switch type ASC9.5, or 1 double auxiliary switch, ASC9.4 or 1 potentiometer and 1 auxiliary switch type ASZ7.4.

Application

Boiler flow from the right or left. The manual adjuster, scale plate and valve slipper can be re-positioned to suit the application

## **Sizing**

## Flow diagram

Maximum permissible differential pressure across the slipper valve's control path, valid for the  $\Delta p_{\text{max}}$ 

entire actuating range of the motorised slipper valve

 $\Delta p_{v100}$ Differential pressure across the fully open slipper valve by a volume flow  $V_{100}$ Volumetric flow through the fully open slipper valve

 $\dot{V}_{100}$ 

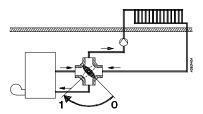

100 kPa 1 bar ≈ 10 mWC 1 m<sup>3</sup>/h 0.278 l/s water at 20 °C

#### **Engineering**

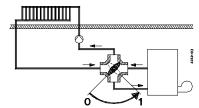

The VCI31... four-port valves should be installed in accordance with the flow-direction arrows on the slipper valve body. In systems where oxygen can enter the hydraulic system, there is an increased risk of corrosion which can cause the valve slipper to seize.

Mounting variants

Boiler flow from left

Boiler flow from right

Factory setting

Re-position the valve slipper, the scale plate should be rotated through 180° and manual adjuster, as described in the mounting instructions for VCI31... slipper valves.

#### Mounting

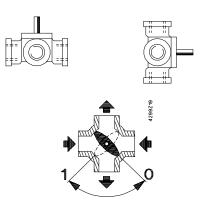

The valves are easy to assemble directly on site.

The valve, actuator and ASK32 mounting kit (if needed) are packed separately.

Accessory	Mounting instruction			
ASK32	M4290.2	4 319 5597 0		

Two special screws are provided in the housing cover to fix the ASK32 mounting kit and the scale plate for position indication.

#### Orientation

# **Factory setting**

Slipper positioned for "boiler flow from left".

- · Clockwise rotation: opening
- Anti-clockwise rotation: closing.

**Manual adjuster** with scale plate, position indicator and groove for position of slipper Position indicator at "0" = boiler flow path fully closed.

## Commissioning

When commissioning the valve, ensure that the position and rotation of the valve slipper are appropriate for the system concerned (see "Engineering").

The position of the valve slipper is indicated by:

- · the manual adjuster and scale plate
- a groove on the front of the slipper valve shaft (only visible if no manual adjuster is fitted)

Before performing any service work on the valve, actuator or mounting kit:

- switch OFF the pump and power supply
- close the main shut-off valve in the pipework
- release pressure in the pipes and allow them to cool down completely.
- If necessary, disconnect electrical connections from terminals.

The slipper valve can be commissioned with the manual adjuster fitted, or with a correctly fitted actuator.

#### **Disposal**

Before disposal the slipper valve must be dismantled and separated into its various constituent materials.

Legislation may demand special handling of certain components, or it may be sensible from an ecological point of view.

Current local legislation must be observed.

## Warranty

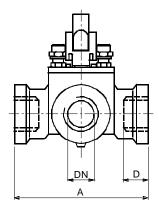

The technical data given for these applications is valid only in conjunction with the Siemens actuators as detailed under «Equipment combinations».

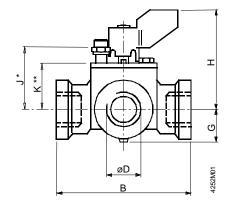

All terms of the warranty will be invalidated by the use of actuators from other manufacturers.

#### **Technical data**

PN class	PN 10 to ISO 7268		
Working pressure	max. 1000 kPa (10 bar) to ISO 7005 within the
